Table II

Logarithms of Numbers

from 1000 to 1399, to five places of decimals

N.	0	1	2	3	4	5	6	7	8	9	D.

The mantissa is printed without its characteristic, which is 3 for every entry on this page. The column headed D. gives the difference between the first two entries of the row, and decreases down the table as the logarithm varies more slowly. No figure in the body was typed: a short Lua function computes each mantissa when the page is compiled, and the table is extended by changing two numbers in the source. Lining figures were chosen because old-style figures descend below the baseline and disturb the alignment a table depends on.
